

חמישה צעדים לפתיחת דיאלוג בעל נקודות מבט שונות

חמישה צעדים לפתיחת דיאלוג בעל נקודות מבט שונות

01

Draw a circle in the middle of the white-board. Pose that the circle represents that which we know

02

Then draw two smaller circles as shown. Point out that from either perspective you can only see half of the bigger circle.

03

Tell the class that the person on the left will perceive his or her 'truth' as the number six, influenced by his or her vantage point in time and place. The person on the right will perceive his or her 'truth' to be the number nine, because of his vantage point.

04

State that in order to see both side of the circle people have to communicate about their perceptions and acknowledge that perceptions are influenced by one's vantage point

05

Finally, introduce the theme you want to discuss with the class. Then ask the class about their perceptions of the theme and write these around the circle.
